INFORMATION FOR PHYSICIANS

HIGHEST QUALITY THROUGH PERSONAL AND TECHNICAL COMPETENCE

YOUR ADVANTAGES

- _ 9 locations in Vienna
- _ Sample collection
- _ Results usually on the same day
- _ Electronic request for analysis
- _ Electronic transmission of results
- _ All health insurances and private patients
- _ Complete report (medical chemistry, haematology, microbiology, genetic analyses)
- _ Assistance by medical specialists
- _ Laboratory card for your patients / internet diagnosis-query
- _ Information on analyses at www.labors.at
- _ ISO 9001 system certification
- _ ISO 14001 environmental management system

QUALITY THROUGH TECHNICAL COMPETENCE

Due to the consolidation of the 9 practices of the experienced medical specialists MedR Dr. Johannes Bauer, Univ.-Prof. Dr. Georg Endler, Univ.-Doz. Dr. Markus Exner, Dr. Sonja Lener, Dr. Eva Mühl, Dr. Michael Mühl, Univ.-Prof. Dr. Wolfgang Speiser, Univ.-Prof. Dr. Susanne Spitzauer and Dr. Peter M. Winter into the group practice Labors.at, a contemporary organisational form has been created in the field of laboratory diagnostics which makes it possible to offer a comprehensive analytical spectrum in the highest quality.

The constant advanced training of our qualified employees and the most modern technology guarantee the reliability of all examinations performed.

THE PATIENT IS THE FOCAL POINT

We support you in the best possible care of your patients.

In addition to detailed medical and organisational information about all analyses, our website at www.labors.at also offers current articles and brochures about important medical topics and diseases.

THE FOCAL POINT: YOU

Almost all analyses will be performed in-house. That is why the group practice Labors.at offers you a broad spectrum of all laboratory services "from one source."

For you as a referring physician this means the advantage you only have one contact person, who is competent in all matters. And it brings relief to your patients, because they have only one single route in order to have laboratory examinations made.

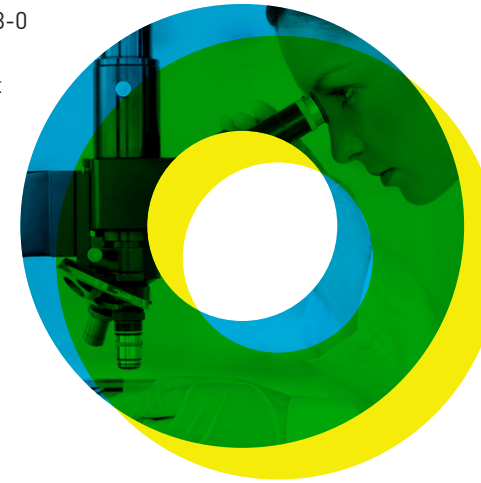

SERVICE FOR COLLEAGUES

The group practice Labors.at has its own laboratory transport service in Vienna, Lower Austria and Burgenland. Most results are generated on the same day and — in addition to fax, mail or delivery through transport service — can also be retrieved via the website.

In addition to the customary electronic transmission of results in your office data processing system, we also offer the possibility of a "paper-free" electronic request for analysis. Our data processing team will gladly assist you with all questions regarding electronic communication between your office and our laboratory (incl. telephone hotline and remote maintenance).

The close cooperation with a pathology laboratory creates a logistical simplification for you.
